It is based on combination of BIO active natural ingredients and BIOmimetic technologies.

Dental therapist Dr. Jost Reger laid the foundation of new formulation of the toothpastes coming from a sapiential story happened to him and his friend Giovanni Di Giacomo.

Once they went to the Alps.

Their walk could be spoiled with toothache happened to Giovanni since hypersensitive teeth were quite sensitive to cold temperatures. There were no medicines with them to treat toothache. All of a sudden Jost noticed Geranium flowers. He heard old legends about magic power of Geranium and remembered bio-researches of this plant. Jost took a leave of the wild Geranium and attached it to the painful tooth. Geranium helped to relieve a sharp, throbbing pain.

Giovanni breathed with ease again, smiled and exclaimed: Dentissimo! He meant “Dentist, Bravissimo!”

So was called the best New Natural formulation – Dentissimo.

The best way to keep Your Smile brilliant is to clean teeth with Dentissimo!

TOOTHBRUSHES
MEDIUM
FOR ADULTS

APPLICATION
- Medium dome-cut bristles for an effective antiplaque action
- Protecting tooth enamel and gums

COMPONENTS AND EFFECTIVENESS
- Ergonomic handle is designed for easy and correct use of the toothbrush
- The dome-cut bristles allow the longer central bristle rows to penetrate delicately under the gum line while the shorter bristles brush the teeth surface
- Ergonomic handle

IMPORTANT
- The product is STERILIZED during the packaging process

TOOTHBRUSH
HARD
FOR ADULTS

APPLICATION
- Hard dome-cut bristles for tartar control without damaging tooth enamel and gums

COMPONENTS AND EFFECTIVENESS
- Ergonomic handle is designed for easy and correct use of the toothbrush
- The dome-cut bristles allow the longer central bristle rows to penetrate precisely under the gum line while the shorter bristles polish the teeth surface
- Ergonomic handle

IMPORTANT
- The product is STERILIZED during the packaging process
TOOTHBRA SH  
SENSITIVE  
FOR ADULTS

APPLICATION

- Microfine external bristles for effective cleaning of interdental surfaces
- Delicate massage along the gumline

COMPONENTS AND EFFECTIVENESS

- Structured internal bristles for effective removal of bacterial plaque without damaging tooth enamel
- Ergonomic handle

IMPORTANT

- The product is STERILIZED during the packaging process

TOOTHBRA SH  
PARODONTAL  
FOR ADULTS

APPLICATION

- The microfine bristles are gentle on irritated gums
- Precise cleaning of gums

COMPONENTS AND EFFECTIVENESS

- Ideal for post surgical cleaning, gum disease and irritated oral mucosa
- Protects the gums against recession
- Ergonomic handle

IMPORTANT

- The product is STERILIZED during the packaging process
**APPLICATION**

- Small head is suitable for the morphological characteristics of a child’s mouth

**COMPONENTS AND EFFECTIVENESS**

- **Soft bristles** remove plaque without irritating teeth and gums
- **Ergonomic non-slip handle** with hole stopper is designed for parent thumb to control kids' brushing
- **Fun suction cup** allows You to attach the brush to various bathroom surfaces

**IMPORTANT**

- The product is STERILIZED during the packaging process
TOOTHPASTE-GEL
JUNIOR 6+ YEARS

FORMULATED WITH NATURAL APPLE FLAVOR

- Strengthens tooth enamel
- Helps to prevent caries
- Gently cleans teeth and gums
- Helps antibacterial action

NATURAL APPLE FLAVOR

The toothpaste-gel has been created specifically for children’s teeth and based on natural ingredients. Apple taste of the toothpaste makes teeth brushing enjoyable and accustoms the child to oral hygiene, teaches habits for health care. The toothpaste prevents caries, strengthens and revitalizes tooth enamel. Due to the presence of Fluoride, Calcium and Vitamins the toothpaste strengthens the tooth enamel and protects sensitive gingival tissue. Pleasant flavor of the toothpaste-gel helps your child to follow daily oral hygiene. The toothpaste “Dentissimo Junior” helps to prevent cavities and makes children’s teeth strong and healthy.

TOOTHPASTES
