# THE STORY OF A SMILE

## DENTISSIMO PROFESSIONAL ORAL CARE

The professional brand Dentissimo products for oral care were developed by specialists of the leading dental clinic in Switzerland, Perfect Smile Swiss Dental Care, Bad Ragaz Grand Resort medical center. The source of inspiration for internationally renowned doctors - Dr. Michael Meier, Founder of the Perfect Smile Dental Care Bad Ragaz clinic, Switzerland, and his colleagues from

Oral Care Research and Development department in Global Swiss Group, Switzerland, – originated from thermal water of a unique spring in the Swiss resort of Bad Ragaz.

Dentissimo toothpaste formulas were developed taking into account the latest research on oral care methods and considering the patients' individual specific features.

"Thanks to our experience gained over the years, we know that each individual case in dental care is unique. To accommodate the numerous characteristics of patients we have created multifunctional and at the same time as unique products as each of us. The goal of the project is to improve the quality of life for our patients by providing them with high-grade oral care products."

Dr. Michael Meier, Founder of  
Perfect Smile Swiss Dental Care

Vitality, joy for life and health are reflected through beautiful and healthy teeth. We at Bad Ragaz Perfect Smile Swiss Dental Care put your individual wishes in focus. At the top of our list are preventive measures to maintain and enhance the beauty of your teeth. We guarantee the highest quality and stand for the most modern, interdisciplinary treatment methods and techniques. A pleasant practice atmosphere combined with the highest professional competence of the whole team lays the foundation for comfortable, painless and sustainable treatment.

Perfect Smile

*Swiss Dental Care Bad Ragaz*

FROM THE HEART  
OF BAD RAGAZ

[resortragaz.ch](https://resortragaz.ch)

As early as 1242, the healing quality of thermal water was discovered: in order to heal from ailments, people were lowered in wicker boxes on long ropes into the thermal springs.

In the 16th century, the Swiss alchemist, physician and philosopher Paracelsus praised the curative properties of the thermal water from Tamina gorge for its unusually rich mineral composition and the optimal for a man temperature of 36.5°C. Paracelsus scientifically confirmed the healing power of the water and said that the water from a spring in the gorge is a special gift to people from God.

In 1840 a four-kilometer pipeline was laid to the city of Bad Ragaz where the first European indoor thermal pool was built in 1872. From here began the well-developed infrastructure of thermal baths and spa resorts, which initially attracted such guests as Nietzsche, Thomas Mann and Victor Hugo. Representatives of the upper classes – princes and dignitaries, aristocrats, politicians and economists from different parts of the world – felt comfortable and cozy in Bad Ragaz. They recovered in the thermal pool because from ancient times it was known that thermal water had a beneficial effect on the human body in general.

## DENTISSIMO SPA EXPERT LINE

Bad Ragaz is the true spirit of Switzerland and its strength and pureness endlessly inspire for creation of new Dentissimo Professional Oral Care products. Today, the work at the Research and Development department in Global Swiss Group, Switzerland, is focused on the new Dentissimo SPA Expert line which will significantly benefit the Dentissimo customers.

# MOUTH AND TEETH SPA EXPERIENCE

## TOOTHPASTE SPA EXPERT WITH BAD RAGAZ THERMAL WATER

New DENTISSIMO® SPA EXPERT toothpaste is enriched with unique Tamina Thermal Water from Bad Ragaz. The composition of SPA EXPERT toothpaste is based on remineralizing agents and active ingredients to nourish gum tissue and provide deep tooth enamel remineralization. The exclusive toothpaste has a balanced formula of natural extracts, active components and Tamina Gorge Thermal Water to savor the ultimate Swiss thermal spa experience.

# TOOTHPASTE DIAMOND FOR SENSITIVE TEETH

Pearly toothpaste contains Swiss diamond powder that smooths, cleans and polishes enamel gently and safely. Diamond Powder and Xylitol help to inhibit plaque buildup, thus contribute to restoring the natural white color of tooth enamel. Strontium Chloride relieves tooth sensitivity and Hydroxyapatite contributes to tooth enamel remineralization. Fruit Enzyme Papain helps to gentle whitening, Mica brings glow, aesthetics, and healthy appearance of a smile. Geranium Maculatum and Vitamin E maintain teeth and gums healthy and assist in soothing action on irritated gums. Daily use means all-round dental care, fantastic smile with a sparkling diamond shine. Delicate flavor complements the composition and gives a pleasant feeling of fresh breath.

## BRILLIANT SOOTHING EFFECT WITH SWISS DIAMOND POWDER

-  SWISS DIAMOND POWDER
-  POLISHING TOOTH SURFACE
-  LOW RDA VALUE
-  FLUORIDE-FREE

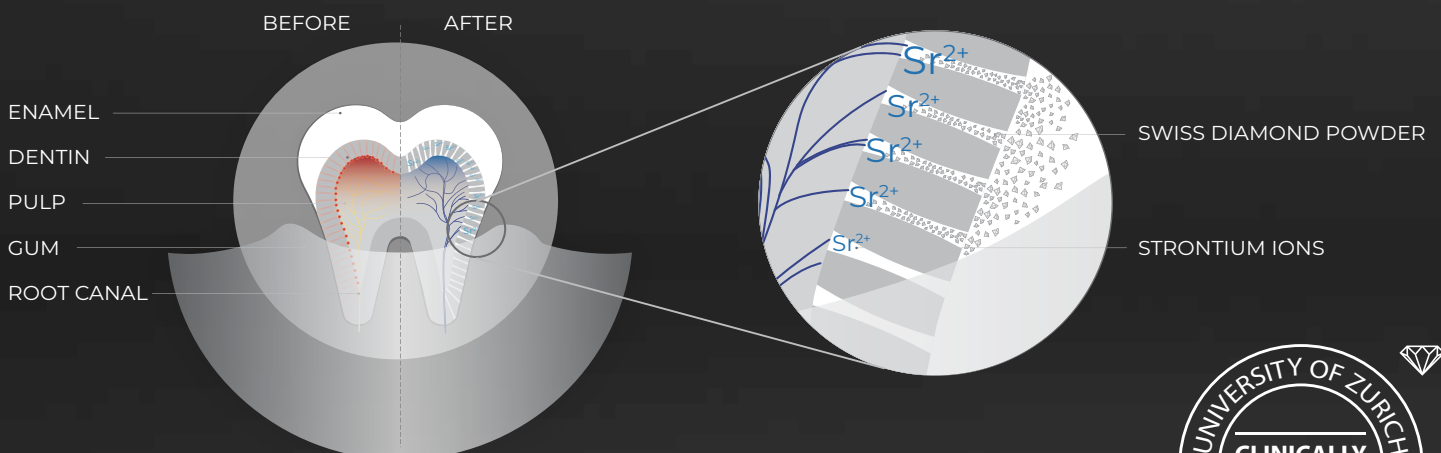

LIMITED EDITION  
 SWISS DIAMOND POWDER

## CLINICALLY VALIDATED

Strontium ions penetrate the dentin and block the nerve endings, while the particles of diamond powder (their diameter coincides with the diameter of the dentinal tubules:  $\leq 3$  microns) fill the dentinal tubules and seal them. Thus, tooth sensitivity is significantly reduced.

- REDUCES TOOTH SENSITIVITY
- RESTORES NATURAL WHITE COLOR OF TOOTH ENAMEL
- PROVIDES TOOTH REMINERALIZATION
- PREVENTS PLAQUE AND TARTAR BUILDUP
- POLISHES TOOTH ENAMEL
- DELICATE TO DENTIN

 Center of Dental Medicine, University of Zurich, Switzerland.  
 Clinical validations were published in Swiss Dental Journal, 2018: Tawakoli P. N., Klaus B., Attin T. Abrasive effects of diamond dentifrices on dentine and enamel. Swiss Dent J SSO 128: 14–19 (2018).

## TOOTHPASTE-GEL ADVANCED WHITENING GOLD

DENTISSIMO® innovative GOLD Formula contains actual 24-karat gold particles. Gold is known for its antibacterial properties. It also increases blood flow, thereby stimulating soft tissue regeneration and healing. GOLD toothpaste combines these great benefits to be the original and highly effective product.

DENTISSIMO® GOLD delivers professional tooth whitening results and helps to achieve a Fantastic Smile without harsh abrasives and bleaching.

The advanced Hydrated Silica offers a high-performance whitening boost. Sodium Hyaluronate with hydrating activity contributes to aesthetics and the healthy appearance of gum tissue. Geraniol, Eugenol, Iron oxides enhance sanitizing action. Mica adds shine to a smile.

## EXTRA-WHITENING BLACK WITH NATURAL 100% ACTIVATED CARBON

The new leader in whitening toothpastes, DENTISSIMO® BLACK makes your teeth shining to brilliancy. The toothpaste effectively and safely whitens tooth enamel, polishing your teeth. Innovative combination of active natural ingredients helps to strengthen the tooth enamel, possesses unique anticaries properties and prevents the formation of dental plaque and cavities.

Activated carbon is 100% natural vegetable charcoal. It absorbs odors, inhibits the growth of bacteria and creates a fresh breath, effectively protects the tooth enamel from the formation of tartar and normalizes the pH of saliva. The toothpaste BLACK is giving you a long-lasting feeling of the pleasant fresh breath.

Thanks to the presence of **Hexetidine** the mouthwash is valuable aid in the control of halitosis. Does not stain your teeth.

- Ensures fresh breath
- Helps to strengthen gums

TOOTHBRUSH MEDIUM  
FOR ADULTS

## APPLICATION

- **Medium dome-cut bristles** for an effective antiplaque action
- Protecting tooth enamel and gums

## IMPORTANT

- The product is **STERILIZED** during the packaging process

## COMPONENTS AND EFFECTIVENESS

- **Ergonomic handle** is designed for easy and correct use of the toothbrush
- The **dome-cut bristles** allow the longer central bristle rows to penetrate delicately under the gumline while the shorter bristles brush the teeth surface

TOOTHBRUSH HARD  
FOR ADULTS

## APPLICATION

- **Hard dome-cut bristles** for tartar control without damaging tooth enamel and gums

## IMPORTANT

- The product is **STERILIZED** during the packaging process

## COMPONENTS AND EFFECTIVENESS

- **Ergonomic handle** is designed for easy and correct use of the toothbrush
- The **dome-cut bristles** allow the longer central bristle rows to penetrate precisely under the gumline while the shorter bristles polish the teeth surface

TOOTHBRUSH SENSITIVE  
FOR ADULTS

## APPLICATION

- **Microfine external bristles** for effective cleaning of interdental surfaces
- Delicate massage along the gumline

## IMPORTANT

- The product is **STERILIZED** during the packaging process

## COMPONENTS AND EFFECTIVENESS

- **Structured internal bristles** for effective removal of bacterial plaque without damaging tooth enamel
- Ergonomic handle

TOOTHBRUSH PARODONTAL  
FOR ADULTS

## APPLICATION

- The **microfine bristles** are gentle on irritated gums
- Precise cleaning of gums

## IMPORTANT

- The product is **STERILIZED** during the packaging process

## COMPONENTS AND EFFECTIVENESS

- Ideal for postsurgical cleaning, conditions of gum disease and irritated oral mucosa
- Protects the gums against recession
- Ergonomic handle

TOOTHBRUSH GOLD MEDIUM  
LIMITED EDITION

## GOLD MEDIUM

**Round-ended medium bristles** help to remove plaque and keep your teeth and gums healthy.

**Medium Tynex®** bristles with translucency and glistening look, while retaining the superior cleaning ability, do not damage the tooth enamel.

**Ergonomic handle** is designed for easy and correct use of the toothbrush.

- Coated with 24 kt GOLD
- Plastic case can be used as a portable case for correct hygiene of the toothbrush
- Round-ended Tynex® bristles by DuPont™

TOOTHBRUSH SILVER HARD  
LIMITED EDITION

## SILVER HARD

**Round-ended hard bristles** help to fight against tartar without scratching the tooth enamel, keeping your teeth and gums healthy.

**Hard Tynex®** bristles with superior plaque cleaning ability do not damage the tooth enamel and gums.

**Ergonomic handle** is designed for easy and correct use of the toothbrush.

- Plastic case can be used as a portable case for the proper hygiene of the toothbrush
- Round-ended Tynex® bristles by DuPont™

TOOTHPASTE-GEL

## APPLICATION

- Compact head is ideal for a child's dental arch

## COMPONENTS AND EFFECTIVENESS

- **Uniformly round-ended soft bristles** for an antiplaque action while protecting tooth enamel and gums, important for the prevention of cavities of the growing teeth.
- **Soft rubber handle** guarantees a safe grip for the correct use of the toothbrush

## IMPORTANT

- The product is STERILIZED during the packaging process

TONGUE CLEANER  
DUAL ACTION

APPLICATION

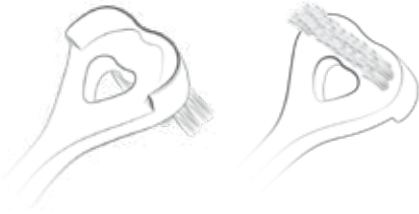

- Efficiently removes plaque, bacteria, food debris and dead cells from the surface of the tongue
- Two rows of bristles** and **scraper** improve oral hygiene contributing to maximum cleaning

COMPONENTS AND EFFECTIVENESS

- Ergonomic non-slip handle** with a hole stopper is designed for the correct placing of the tongue cleaner in hand
- Dual action - brush** and **scraper** offer maximum cleansing for thorough, deep and gentle tongue cleaning
- The **scraper** removes bacterial plaque from the tongue surface, reducing bad breath

IMPORTANT

- Professionally recommended for fighting bad breath

INTERDENTAL  
BRUSHES

APPLICATION

- Effective cleaning of interdental spaces between teeth, crowns, bridges
- Flexible toothbrush grips to remove bacterial plaque between hard to reach interdental areas

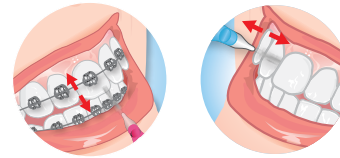

COMPONENTS AND EFFECTIVENESS

- The **tapered shape with fine bristles** for effective cleaning of interdental spaces of different sizes
- Plastic coated wire** is designed for safety and gentle cleaning
- The **hygienic cap** can be used for brush protection or to extend the handle
- Antiseptic protection** on the bristles prevents pathogens growth
- Ergonomic non-slip handle**

IMPORTANT

- The sizes are color coded for easy identification

BRUSHES HAVE BEEN DEVELOPED FOR  
ORTHODONTIC CARE AND HEALTHY GUMS  
MAINTENANCE

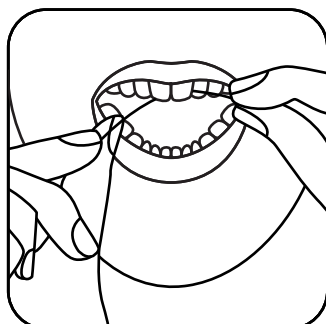

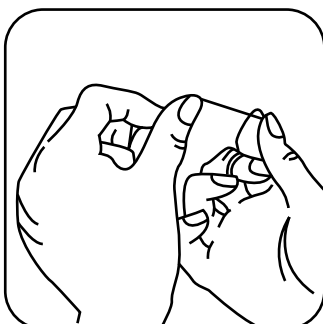

DENTAL TAPE FLOSS

The front teeth, especially the lower ones, often sit very close to each other. So close that not even a tiny interdental brush can fit between them. Regular toothbrushes also cannot clean underneath the gum-line. In these cases, dental tape is a perfect choice to remove food particles and plaque from between teeth or clean the area under the gum line.

APPLICATION

- Effectively cleans small interdental spaces between tight teeth due to a little thickness and smooth surface.
- Allows easy wrapping and holding around the user's fingers due to the flat design.
- Provides a simpler and quicker method of flossing without compromising the quality of cleanliness.

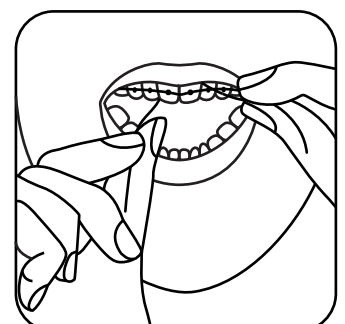

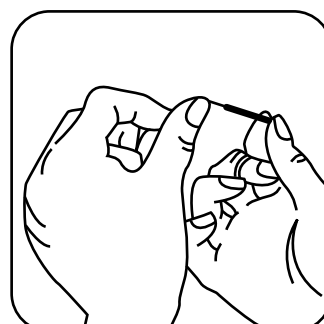

DENTAL FIBER FLOSS

Dental braces, bridges and retainers make oral hygiene maintenance more difficult, and therefore they need special attention. A wider tufted, yarn-like central portion of the floss strand offers more effective and quick dental plaque and food remnants removal in fewer user's movements. Dental floss can be gently inserted between the tooth necks and orthodontic appliances.

APPLICATION

- The spongy central part allows deep cleaning of the areas adjacent to the fixed prosthesis and large interdental spaces.
- Stiffened nylon ends facilitate accurate sliding into hard-to-brush spaces and removal of subgingival plaque.
- Comfortable use of 50 pre-cut strands with a large central part of cleaning fiber.
